

Painting (332)

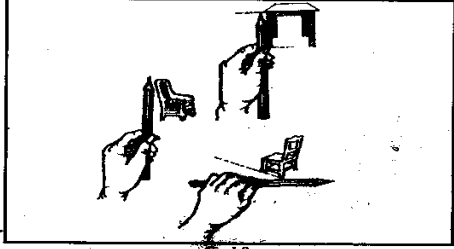

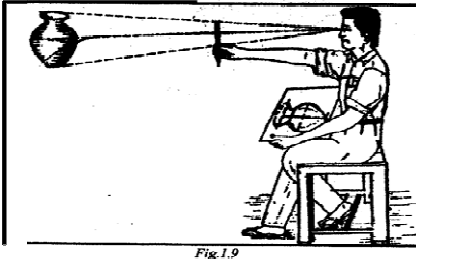

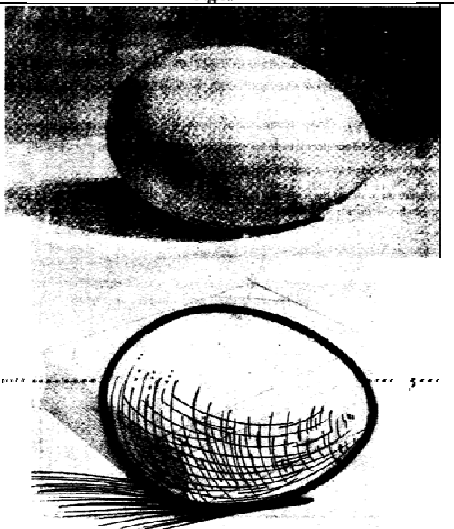

L. No	Title of the Lesson	Skill	Activity
1	Object Drawing	Appreciation ability, Creative thinking, Critical thinking, Problem Solving	Visiting studio and Library to be able to identify and learn about the Object Drawing.

Meaning

Draw the object very faintly with your pencil to create correct shape. Prior to that time the subject matter was studied primarily as preparation for use in figurative composition. The art of the object drawing is the rediscovery and celebration of the familiar world. Subject matter is all around use tumbler, a cup, a book, different kinds of fruits and vegetables, etc. It is very important to study the objects keeping it in front of the painter. So the shape, contour and volume are to be studied both with lines and colors. The painter is supposed to follow some basic steps like perceiving the objects in terms of simple geometrical shapes and he can bring the volume by adding color and shades.

Art Work	Impotent Elements
	<p>You can draw any round objects with the circle.</p> <p>You can draw any square and rectangular objects with square.</p>
	<p>Perspective</p> <p>Linear perspective is generally used in still life drawing. It is a Perspective system in which forms get smaller as they recede in space, receding parallel lines converge at a vanishing point.</p>

 <p>Fig. 1.8</p>	<p>Measure the Object</p> <p>Measure the object from distance by holding a pencil vertically with your small finger at the bottom along with the other three fingers and the thumb on the top to shuttle it up and down to measure the comparative proportion of the object.</p>
 <p>Fig. 1.9</p>	<p>Use of Light and Shade</p> <p>Since only the outline cannot bring the solidity of the object, application of light and shade is required. Notice the source of light as it falls on the object. Other side of the object will be under the shadow.</p>
	<p>Art Work</p> <p>How to Draw A Rectangular Box</p> <p>Measure the width of the book and draw the base line. Measure the length of the book and mark with 'C'. Put point F above point C according to the thickness of the book. Put point G under A and H under E which should be little smaller than CF. Now join A and 'E' with F, and G and H with C. Join 'A' and 'E' and mark no. 3 in the middle of this line. Join this point 'F' and divide into three equal parts. Extend the same division beyond point 3 to get point 4, 5 and 6. Now join point no. 5 with A and E. Now the drawing is ready.</p>
