## National Institute of Open Schooling (NIOS) Secondary Course <br> Lesson -24: Data and their Representations Worksheet - 24

1. Differentiate between Primary data and Secondary data. List out any three primary and secondary data.
2. Write a grouped frequency distribution of the data using the class interval 0-19, 20-39 etc, and find out sum of frequencies of the data.
3. The bar graph represents the number of students present in different classes on a particular day.

The number of students present in classes IX and X are :
4. The data below shows the number of students present in different classes on a particular date as:

| Class | I | II | III | IV | V |
| :--- | :--- | :--- | :--- | :--- | :--- |
| No. of students | 35 | 40 | 30 | 50 | 25 |

5. 

Represent the above data by a bar graph.
5. The following is the frequency distribution of marks obtained by 40 students in the Mathematics test :

| Marks obtained | $30-40$ | $50-60$ | $60-70$ | $70-80$ | $80-90$ | $90-100$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

| No. of students | 10 | 8 | 12 | 2 | 6 | 2 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

6. 

Draw a histogram from the above data.
6. The cumulative frequency distribution of 50 students of class-IX marked showing in the table as:

| Marks | Number of Students |
| :---: | :---: |
| Below 30 | 15 |
| Below 40 | 24 |
| Below 60 | 29 |
| Below 80 | 34 |
| Below 100 | 50 |

7. 

From the above data form a frequency table
7. Day wise manufacture of steel pieces from a company as:

| Day | Monday | Tuesday | Wednesday | Thursday | Friday | Saturday |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Steel <br> manufacture | 15000 | 12000 | 18000 | 22000 | 16500 | 14000 |

8. 

Draw a bar graph to represent the above data.
8. In a week, take daily temperature in your locality and represent the same data through bar graph.
9. Write steps to prepare a Histogram with an example.
10. Marks (out of 80 ) obtained by 40 students in class-X science test examination as:

| Marks obtained | $20-30$ | $30-40$ | $40-50$ | $50-60$ | $60-70$ | $70-80$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |

| No. of students | 5 | 10 | 8 | 7 | 6 | 4 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

11. 

Draw a histogram from the above data.
