# National Institute of Open Schooling (NIOS) Secondary Course <br> Lesson-25: Measures of Central Tendency Worksheet - 25 

1. In a Public School, the enrolment of last five years was $610,705,575,650$ and 600 . Find the average enrolment per year of the School.
2. The mean of marks obtained by 40 students of Section-A of class-IX is 35 , that of 42 students of Section-B is 35 . Find out the mean marks obtained by 75 students in class-IX.
3. If the mean of the following distribution is 6 , find the value $\mathrm{f} p$.

| $\mathrm{x}_{\mathrm{i}}:$ | 2 | 4 | 6 | 10 | $\mathrm{p}+5$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathrm{f}_{\mathrm{i}}:$ | 3 | 2 | 3 | 1 | 2 |

4. 
5. Find the mean of the following distribution:

$$
\begin{array}{cccccc}
\text { Class } & 0-20 & 20-40 & 40-60 & 60-80 & 80-100 \\
\text { Interval : } & & &
\end{array}
$$

Frequency: $\begin{array}{llllll}15 & 18 & 21 & 29 & 17\end{array}$
5.
5. The points scored by a basket ball team in a series of matches are as under:
$14,3,8,24,12,6,11,10,11,21,45,11,9,10,15,26$
6.

Find the median of this data.
6. In a test in maths, the marks scored out of 100 are recorded. Calculate the median for the data:

```
51, \(57,53,44,46,67,60,58,96,44,49,99\)
```

7. 
8. Find the mode of the following data:

| Weight (in <br> $\mathrm{kg})$ | 50 | 51 | 52 | 53 | 54 | 55 | 56 | 57 | 58 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| No. of <br> students | 4 | 7 | 8 | 10 | 12 | 11 | 10 | 5 | 8 |
| :---: | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

8. 
9. Mean of 10 observations was found to be 25 . Later on, it was detected that an observation which was 72 , was taken as 27 by mistake. Find the correct mean of the observations.
10. Calculate the mean daily wage from the following distribution by using step deviation method

| Daily wages | $200-250$ | $250-300$ | $300-350$ | $350-400$ | $400-450$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| (In Rupees) |  |  |  |  |  |

| Number of <br> workers | 10 | 5 | 15 | 12 | 8 |
| :--- | :--- | :--- | :--- | :--- | :--- |

10. 
11. Find the median for the following distribution
$\begin{array}{lllllllll}\text { Height (in cm): } & 140 & 142 & 145 & 148 & 150 & 152 & 156\end{array}$
$\begin{array}{llllllll}\text { No. of student } & 3 & 5 & 7 & 13 & 9 & 8 & 5\end{array}$
12.
